

Beyond Polaris Observing Certificate Checklist

Send the completed checklist to the Coordinator:

Maynard Pittendreigh
 3208 Little Oak Way
 Orlando, Florida 32812
 Telephone: 321-400-4312
 E-mail: Maynard@Pittendreigh.net

Your Name: BRAD YOUNG
 Your Address: 212 E. SIXTEENTH ST. TULSA OK 74119
 Your Email Address: ALLENB_YOUNG@YAHOO.COM
 Your Telephone Number: 918 200 4292
 Your Astronomy Club: ASTRONOMY CLUB OF TULSA
 Send certificate to: you, or your club's Awards Coordinator?

Name of Coordinator: _____

Coordinator's Address: _____

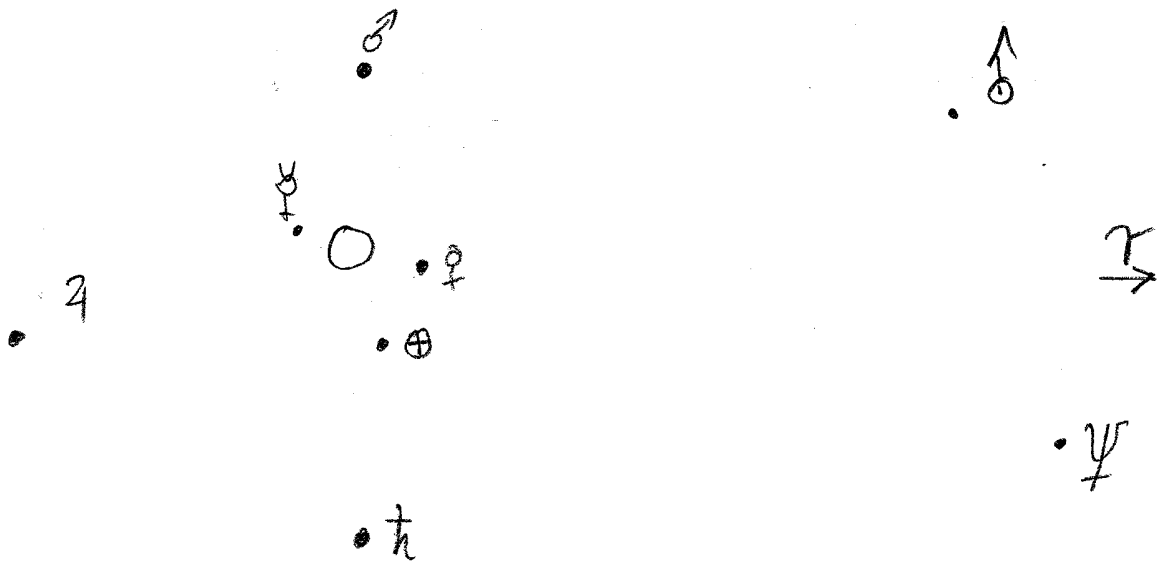

REQUIREMENTS: (Check box on left and enter date and time when completed.)

<input checked="" type="checkbox"/>		<u>Date</u>	<u>Time</u>
<input checked="" type="checkbox"/>	A. Basic Background Information		
<input checked="" type="checkbox"/>	1. Keep a log including notes of each requirement (observations and new knowledge). <i>COMPLETED ON</i>	<u>7/9/17</u>	_____
<input checked="" type="checkbox"/>	2. Understand Star Party Etiquette & create your own Sky Kit (things to take to a star party):	<u>7/7/17</u>	_____
<input checked="" type="checkbox"/>	3. Tell 2 mythical constellation stories.	<u>3/12/17</u>	_____
<input checked="" type="checkbox"/>	4. Research the Milky Way Galaxy, and what it should look like in the night sky.	<u>7/5/17</u>	_____

		<u>Date</u>	<u>Time</u>
[✓]	5. Draw a sketch of the solar system identifying the planets:	7/8/17	_____
[✓]	6. Learn a unique characteristic about each planet:	7/7/17	_____
[✓]	7. Explain the difference between an asterism and a constellation:	7/8/17	_____
[✓]	8. Explain Binary Stars and Star Clusters (open and globular):	3/12/17	_____
[✓]	9. What is the meaning of circumpolar?	3/12/17	_____
[✓]	10. What is the Messier Catalog? Who was Messier and how many objects are in the list?	3/12/17	_____
[✓]	11. What is a Nebula? (Emission and Reflection)	3/12/17	_____
	B. Looking at Stars & Constellations		
[✓]	1. Draw by freehand 15 Constellations:	7/4/17	_____
[✓]	2. Locate and identify three constellations (Ursa Major, Ursa Minor, Cassiopeia, Leo, Orion, The Southern Cross, Cygnus, or others):	7/6/17	10:00 pm CDT
		10/31/16	8:00 pm AEST
		7/18/17	10:00 pm (CDT)
[✓]	3. Locate and identify the North Star/Polaris using other constellations (Ursa Major, Cassiopeia, The Summer Triangle, or Orion):	7/6/17	10:35 pm CDT
[✓]	4. Locate two planets in the night sky.	6/30/17	11:00 pm CDT
[✓]	5. Demonstrate use of a Planisphere.	3/12/17	_____
[✓]	6. Identify Major Stars and Objects in 15 constellations.	7/4/17	_____
[✓]	7. Observe 1 deep space objects with the naked eye (M45, the Pleiades, The Hyades in Taurus, M42 – the Orion Nebula, M44 – the Beehive in Cancer, M41 in Canis Major).	3/12/17	8:30 pm CDT
	C. The Moon		
[✓]	1. Sketch the seven phases of the moon.	VARIOUS From 1/4/17 - 7/6/17	VARIOUS
[✓]	2. Identify three Moon Maria (seas).	7/6/17	10:00 pm CDT

		<u>Date</u>	<u>Time</u>
[✓]	3. Sketch the Man, the Rabbit, and the Woman in the Moon.	7/6-7/17	11:00 pm - 3:00 am ca
[✓]	4. Explain Lunar and Solar Eclipses and draw a diagram.	6/1/17	_____
[✓]	5. What is definition of the Terminator (on the Moon)?	7/7/17	_____
	D. Meteor Showers, Shooting Stars, Falling Stars, Zingers		
[✓]	1. Understand the definitions and the difference between Meteoroids, Meteors, and Meteorites.	7/6/17	_____
[✓]	2. Identify 3 major Meteor Showers and the dates when they occur.	7/7/17	_____
	E. Protecting our Dark Skies		
[✓]	1. Evaluate your personal property related to reducing Light Pollution.	4/2/17	_____
[✓]	2. Learn about Watts, Lumens and Kelvin (color) of light bulbs.	6/30/17	_____
[✓]	3. Educate others on the importance of proper and appropriate outdoor lighting. Include the value of Dark Skies and proper lighting to cost savings, wildlife, human health and enjoyment of the sky.	5/25/17	_____
	F. Future Planning:		
[✓]	1. Document in your log information about the next star party which you plan to attend.	7/5/17	_____
[✓]	2. Review the Astronomical League Observing Programs.	7/1/17	_____

A5. SOLAR SYSTEM (7/8/17):

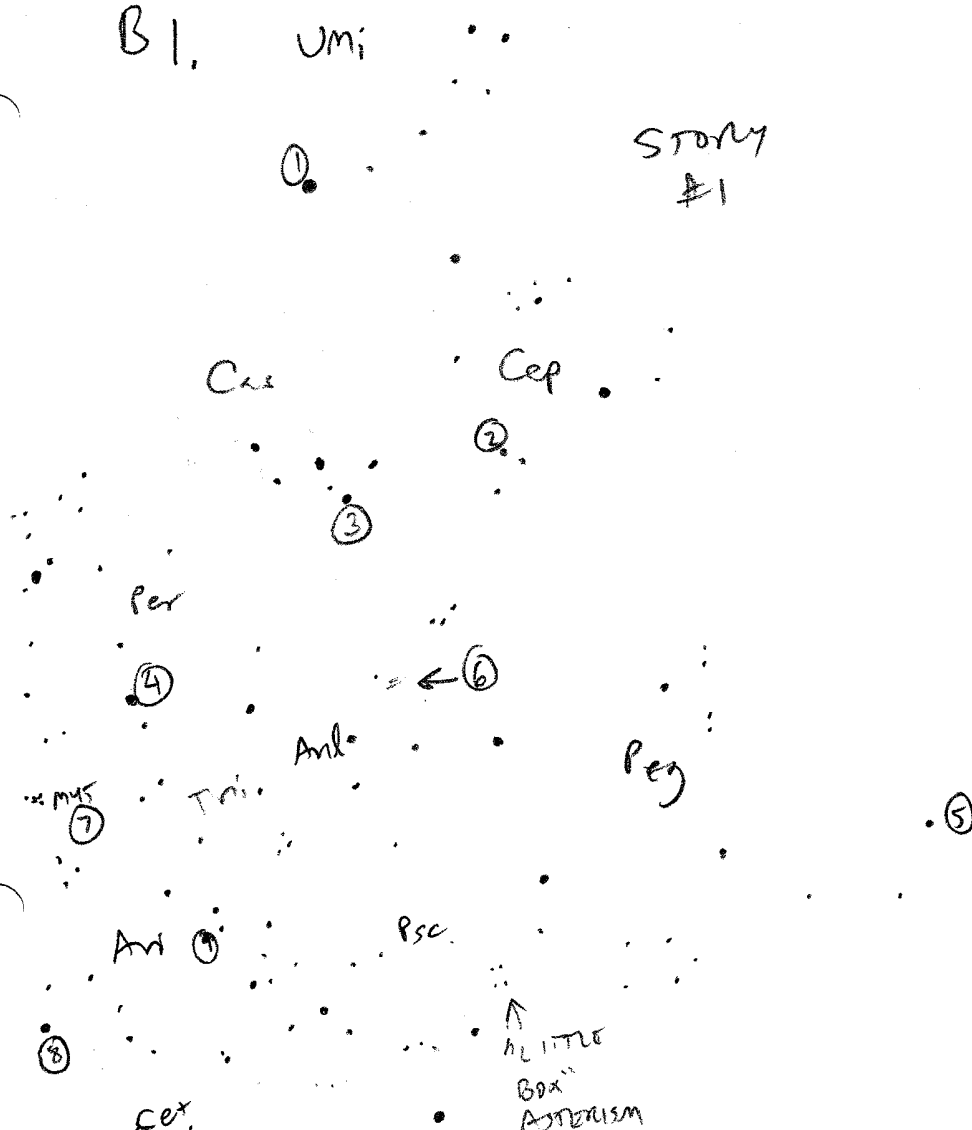

B1. Umi

STORY #1

FOR B6, B7.

- 1 = Polaris (Umi)
- 2 = β Cep
- 3 = α Cas
- 4 = Algal (Per)
- 5 = Enif (Peg)
- 6 = M31 galaxy (And)
- 7 = Pleiades (Tau)
- 8 = α Cet
- 9 = γ Ari (double star)

B1. cont. Story #2

FOR B6. & B7.

11 = Capella (Aur)

12 = Antares (sco)

13 = Hyades
star cluster (Tau)

14 = Aldebaran (Tau)

15 = Betelgeuse (ori)

16 = Orion Nebula
M42

17 = Rigel (ori)

18 = Sirius (CMa)

19 = Procyon (CMi)
